

domio mini

Upgrade your door and make it smart

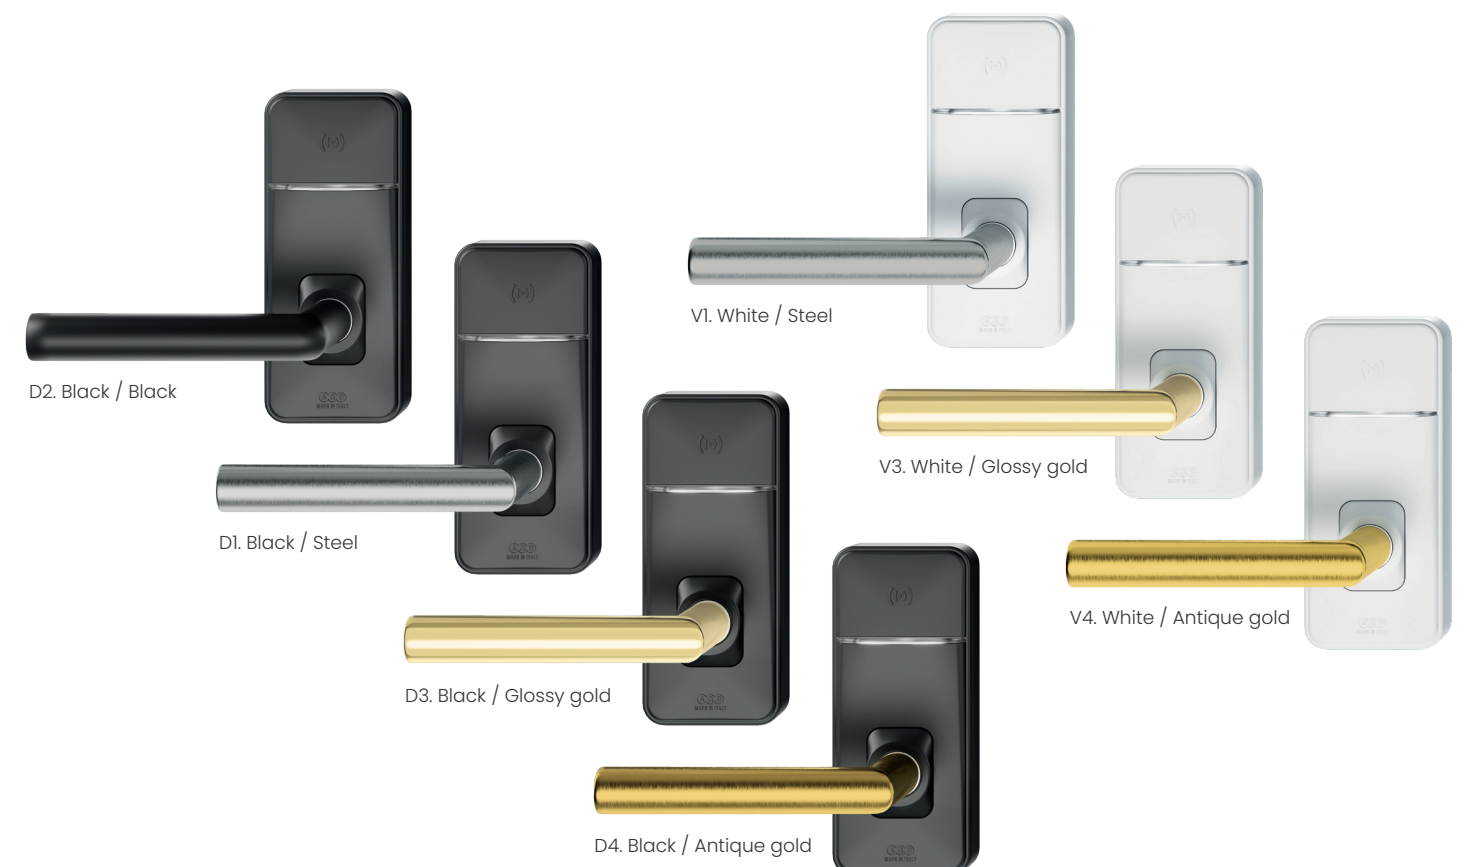

The installation of this unit using only two screws makes it the ideal solution for existing and new doors. Compatible with existing mechanical locks.

Two-colour (green and red) optical signalling enhances the user experience, while security is ensured by a solid anti-drill protection. The concealed fixing screws, provide a smooth and clean design, for a premium look and overall security.

The system offers a wide range of handles and configurations, making it versatile and easily adaptable to different installation requirements.
