SMART LOCKS  
FOR HOTEL DOORS

**O P E R A**  
S M A R T

## OPERA SMART

### RANGE OF SMART LOCKS FOR HOTEL DOORS

AGB introduces the project **Opera smart**: a complete range of locks and accessories for hotel doors that blends design, technological features, simplicity of management and easy installation.

O P E R A **BIT**

ACCESS CONTROL SYSTEM FOR HOTELS

O P E R A **iCONTROL**

ELECTRONIC LOCK FOR HOTELS

O P E R A **TWIN**

ANTIPANIC MAGNETIC LOCK FOR HOTELS

O P E R A **XT**

MAGNETIC LOCK WITH  
ELECTRIC STRIKER FOR HOTELS

### THE ADVANTAGES OF OPERA SMART RANGE

#### DESIGN

- Possibility to choose the handle
- Minimal design of the lock
- Magnetic latch with silent closing

#### SECURITY & SAFETY

- Twin Lock: automatic closing of the bolt
- Anti-burglar security
- Antipanic opening from inside the room
- Mechanical emergency half cylinder for the manual door opening

## DESIGN

### FEEL FREE TO CHOOSE THE HANDLE

With **Opera Smart** you can choose and install the handle of the brand and finish you want. The result is a door with higher design and innovation.

### MINIMAL PERSPECTIVE

We opened the door to the finest design research. Every component of the system shows an innovative and minimal design.

### MAGNETIC LATCH

The lock forend is minimal thanks to the magnetic latch that disappears when the door is open.

**Opera iControl** and **Opera Bit** require handles fixed with through screws and grip integrated with the rosette.

OPERA BIT

PRODUCT SELECTED BY  
ADI DESIGN INDEX

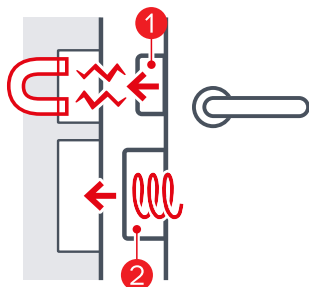

## SECURITY & SAFETY

### Twin Lock

The Twin lock system protects the security of your room. Available for Opera Bit, Opera iControl and Opera Twin.

The **magnetic latch** ① comes out when the sash leans against the frame and the **automatic bolt** ② is activated ensuring the maximum antiburglar security.

The magnetic movement latch creates new silence standard when the door closes.

### Shockproof

The particular manufacturing process of the steel bolt guarantees great resistance to impacts.

### Antiburglar strength

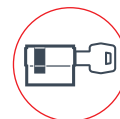

The bolt protects the room from break-in attempts with deftness or tools.

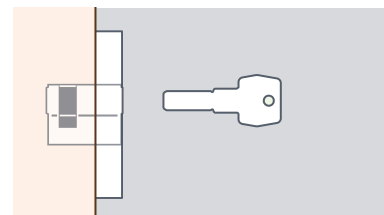

### Antipanic lock

From inside the room, bolt and spring latch are instantly released by simply lowering the handle for the immediate door opening.

### Emergency cylinder, one more chance

Even in the electronic locks, the mechanical cylinder as a standard guarantees the manual door opening.

O P E R A

BIT

## ACCESS CONTROL SYSTEM FOR HOTELS

Access control  
integrated in the lock

Opening with  
contactless card

No wiring  
necessary

Dedicated software  
available

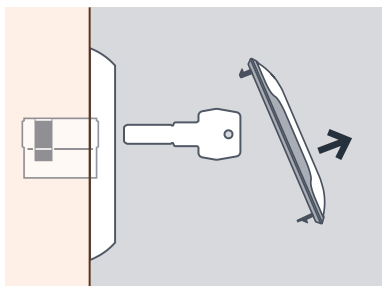

## Integrated reader

Opera Bit shows an innovative and minimal design, thanks to the little reader and the battery holder.

## Highly customisable

The personalisation of the cover finish sets the designer creativity free.

## Emergency mechanical cylinder

## Contactless card

Thanks to the RFID technology (*Radio-Frequency Identification*), the card is double-face and it works contactless: it's enough to approach it to the reader.

The card can't be duplicated, it doesn't risk to be demagnetized or even damaged by scratches.

## Multifunction

The card supports all the hotel functions, even if they are provided by third party.

## Customisable graphic

The card can be customised with the logo and the graphics of the hotel owner also available in eco-friendly material.

### RFID TECHNOLOGY

- Material: eco-friendly on request
- Frequency: 13,56 MHz
- Standard ISO 14443A (1K Classic)
- Compatible with NFC technology

## No wiring

Thanks to the battery holder integrated on the room side of the sash, no wiring is required.

## Do not disturb

The guest can use the function "Do not disturb": the staff won't be allowed to enter the room.

## WHAT KIND OF USER ARE YOU?

### Opera Bit **SPRINT** Version

Choose the design and the security of the **Opera Bit** lock, using the simplicity of the access management offered by the **SPRINT** version.

### Opera Bit **FULL** Version

Design and security guaranteed by **Opera Bit**, together with a software that offers a complete management of accesses in rooms and common areas.

#### Did you know that...

Opera Bit is growing with you?  
Start with the **SPRINT** version;  
whenever you want, you can switch  
to the **FULL**, version, just installing  
the dedicated software without  
replacing the locks.

#### Did you know that...

you already use a management software  
or an automation system for the room?

**Opera Bit, FULL version**, can be  
interfaced with all the softwares  
in the market.

## SPRINT VERSION

**SIMPLE & FAST!**

### READY, STEADY, GO!

You don't need any software or computer.

The special cards allow to manage the accesses in a simple and fast way.

#### ACTIVATION CARD

Creates new cards.

#### RESET CARD

Cancels the cards linked to a lock.

### SIMPLICITY AT WORK

Approach the Activation Card to the reader.

The reader starts flashing.  
Approach a new card.

The card is ready to open the door.

BIT

FULL VERSION

OperaBit **Nebula**

Web app for access control Made in Italy

## FULL VERSION - THE SOFTWARE

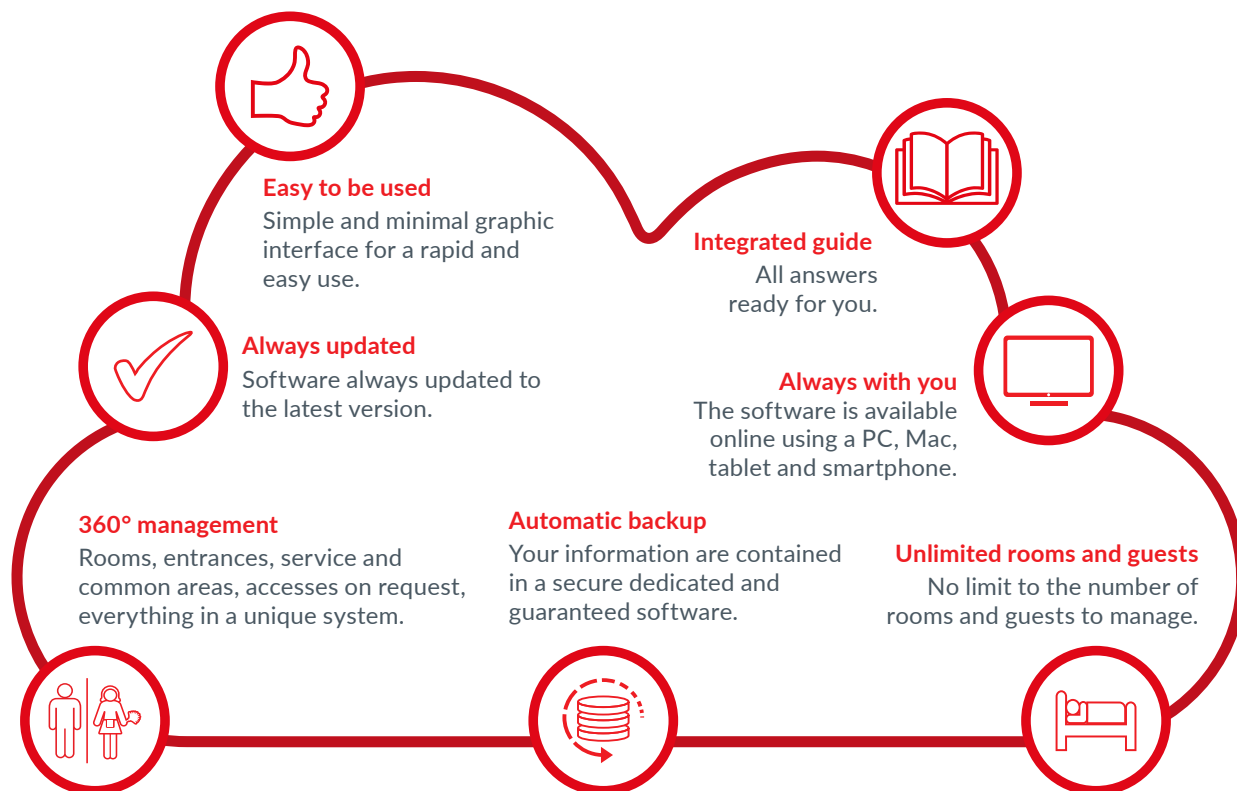

### OPERA BIT NEBULA IS THE AGB WEB APP FOR THE FUTURE

It securely manages **each access** of your hotel, regarding the rooms, the entrance door or a service that you offer to your guests and available for your staff.

Keep under control all the doors **from each device**, PC, Mac, Android or iOS, without renouncing to simplicity and speed of having a modern interface designed according to your needs.

Thanks to the **simplified check-in**, in 2 clicks you can **reduce the necessary time to realise the cards**, reducing also the waiting time at the reception, giving more time to your guests and let them enjoy their stay.

The **continuous automatic backup** of all the information and settings in our servers allows to **manage your hotel in real time** all over the world, you only need an internet connection.

OPERA **iCONTROL**

## ELECTRONIC LOCK FOR HOTELS

The perfect lock for hotels  
that have already installed  
an access control system

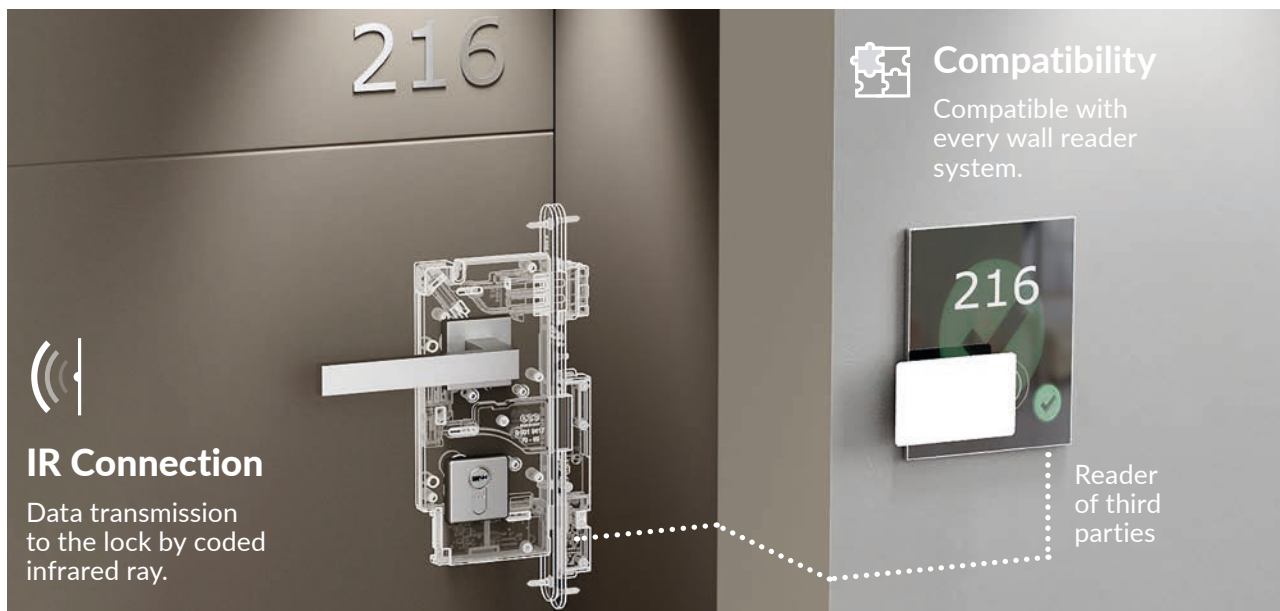

Compatible with  
any wall reader system

Security, design and silence  
for the door

## THE PERFECT CHOICE FOR ANY ACCESS CONTROL SYSTEM (RMS)

## OPERA iCONTROL WORKS AS AN ELECTRIC STRIKER, BUT IT ALSO ENSURES:

### MORE DESIGN

Feel free to choose the handle.

Minimal forend of the lock and the striker.

The striker is the same both for right and left doors, without wing.

### MORE SECURITY & SAFETY

Magnetic latch and automatic bolt for full anti-burglar security.

The sintered steel bolt protects the room from break-in attempts.

The emergency mechanical half cylinder guarantees the manual door opening.

## CONCEALED BATTERY HOLDER: MINIMAL DESIGN, MAXIMUM SECURITY

### Innovative design

Each system component has an innovative and minimal design: the battery holder has been hidden into the sash to set the designer creativity free.

### Easy to be installed

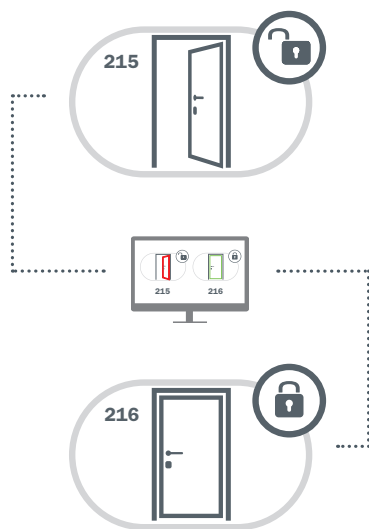

The sash battery holder is extremely easy to be installed and it guarantees the perfect system operation. The replacement of batteries is immediate and it doesn't require any technical skill.

## STRIKER WITH BOLT SENSOR

The bolt sensor is available pre-installed in kit or separately as an accessory. It allows the RMS (Room Management System) to know if the door is open or closed with the bolt.

This allows, for example, to communicate a possible break-in attempt in progress to the alarm system.

OPERA **TWIN**

## ANTIPANIC MAGNETIC LOCK FOR HOTELS

Opening with  
mechanical cylinder

Twin Lock: magnetic latch  
and automatic bolt

Silent door closing thanks  
to the magnetic latch

## Latch release with key

By operating the cylinder, the lock let the magnetic latch and the automatic bolt retract.

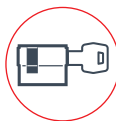

A light push on the knob allows the door opening.

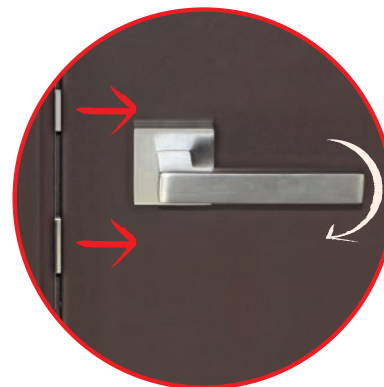

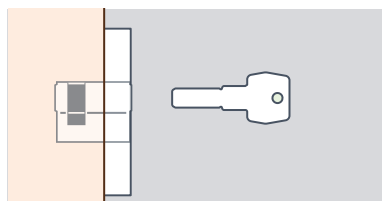

## Suitable for flush concealed framed doors

Thanks to the magnetic latch, sash and frame have no protrusion: it is the perfect solution for concealed framed flush doors.

## Compatible with European half cylinder

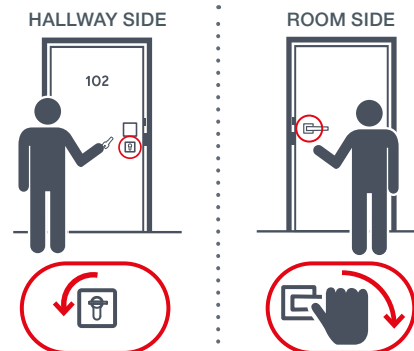

Choose the half cylinder suitable for your needs from the AGB range.

## Automatic magnetic lock with antipanic function

When the guest enters or exits the room, the magnetic latch comes out as soon as the sash leans to the frame and the bolt is automatically activated ensuring the maximum antiburglar security.

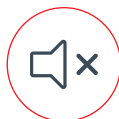

When the door is closed, from inside the room, lowering the handle, both the latch and the bolt will be automatically unlocked.

## Essence of lines

The lock doesn't have protrusions on the forend thanks to the latch which is completely retractable and flush to the door.

## Incredibly silent

The magnetic movement ensures incredible silence in closing.

O P E R A **XT**

## MAGNETIC LOCK WITH ELECTRIC STRIKER FOR HOTELS

Magnetic  
latch

Compatible with  
every wall reader

For doors with knob  
or fixed handle

## NEW MAGNETIC ELECTRIC STRIKER

- No compulsory position of the striker to the frame;
- Non-handed striker;
- Available in configurations with and without repeater and hold-open device.

## COMPATIBLE WITH EVERY WALL READER SYSTEM

The design of fixed handle has been combined with the comfort of a system which is compatible with each wall reader.
